PROJECTS

SafeMax-Security[[CompanyWebsite](#)] | ReactJs, NodeJs, MongoDB, Tailwind Css | [Github](#) Oct 2024 - Nov 2024

- Designed and developed a responsive landing page for SafeMax Security, incorporating dynamic transitions, mobile-first design, and engaging content sections (Hero, About Us, Services, Testimonials, Contact) to showcase the company's cybersecurity expertise.
- Implemented backend functionality to manage user queries and appointment scheduling, ensuring a fully integrated and interactive user experience.

Aero-Social | ReactJs, JavaScript, Tailwind CSS, Sanity | [Github](#)

Aug 2024 - Sep 2024

- Dynamic Pinboard Social Media App created with React for the front end. It enables users to create, save and download content with a login page. **Sanity** powers the backend, offering a headless CMS for organizing and storing posts, user information, and interactions.
- Demonstrated expertise in design and integration best practices. Focused on usability and scalable client onboarding, showcasing data organization.

IGDb | ReactJs, TypeScript, ChakraUI, Bootstrap, API Integration | [Github](#)

Jan 2024 - Feb 2024

- Built a game discovery web app, **Internet Game Database**, for all games with responsive filters and themes making it user-friendly.
- Showcased adaptability with TypeScript and responsive design techniques. The project highlights frontend/backend integration and user interface focus, which align with secure cloud-based data handling.

SKILLS

Languages: C++, JavaScript, HTML, CSS, Python, SQL

Frameworks: ReactJS, NodeJS, Angular, Tailwind CSS, Bootstrap, MongoDB, ChakraUI

Tools: Git & GitHub, Sanity, MS Excel, Virtual Machines, Jupyter Notebook

Platforms: Linux, Windows, Ubuntu
